

A new Standard of performance

You have been asking for this: a patient room recliner with a 500 lbs capacity, ample but "non bariatric" dimensions and a "non bariatric" price. We went to work and today we are pleased to introduce our new 500 Series.

It includes three high performance chairs, featuring effortless reclining into multiple positions, a 500 lbs capacity and an all inclusive 12 year warranty. The high performance casters provide exceptional maneuverability and the optional "speed lock" allows for the locking of the recliner in place at the touch of a pedal.

Each piece is available in a wide selection of materials, finishes (including urethane arm caps) and a broad collection of functional accessories.

Thank you for allowing us to develop another solution to your pressing needs.

Dario Delmestri
President

These are just some of the US Hospitals that rely on IoA for their Medical seating products.

Duke Hospital

U. Of Wisconsin Med. Ctr.

Sloan Ketering Memorial

Introducing the 500 series, a new standard of performance.

IOA

A patient recliner with a multitude of reclined positions and trendelenburg position, available with a wide array of accessories.

The multilock features an independent footrest and back. The central locking system allows you to easily lock the recliner in place with a simple press of the pedal.

A patient recliner which features the ability to lock into any position from upright to a flat sleeping position.
