

Connect chair

A chair that facilitates and fosters a better connection between patient and caregiver, using technology to improve human interaction.

*The
Nightingale Awards
2007 Winner*

The Connect Chair, with its smooth and safe motorized movement can be reclined to any position desired, including a flat position. With the touch of a button, the chair can be safely raised all the way to a 32" height, facilitating the transferring of the patient to and from the bed, reducing the risk of injury for both patient and staff.

By improving the well being and the moral of hospital staff, reducing the risk of injuries for patient and staff, the Connect Chair has a profound affect on the quality of care. Further more, the Connect Chair versatility to function as an exam table gives hospitals more options for performing diagnostic procedures and delivering care in ambulatory care and emergency departments and other out patient settings.
